

Index

A

- Adverse childhood
 - experiences, 34
- Adverse events, 33
- Animal models, 101
- Antibiotics, 100
- Anxiety, 3, 34
- Apoptosis, 85
- Asperger's syndrome, 2, 3, 18
- Attention-deficit hyperactivity disorder, 3
- Atypical sensory characteristics, 55
- Atypical sensory multisensory integration, 46
- Auditory electroencephalography, 58
- Auditory functional magnetic resonance imaging, 59
- Autism brain imaging data exchange database, 9
- Autism diagnostic observation schedule, 20
- Autism spectrum disorders, 1, 17, 43, 55, 67, 79
- Autism, 33

B

- Bacteroidetes, 96
- Behavioral mechanisms, 46
- Behavioral therapy, 22
- Biological mechanisms, 73
- Brain, 98

C

- Calcium homeostasis, 83
- Calcium signaling, 83
- Caregivers' understanding, 61
- Case study, 35
- CBT-T, 39
- Childhood disintegrative disorder, 2
- Chromosomal deletions/duplications, 69
- Classification, 56
- Clinical diagnosis, 2
- Clinical features, 2, 4
- Cognitive behavioral therapy, 37
- Cooperative attitudes, 61

D

- Depression, 34
- Diagnosis, 17, 18
- Diagnostic tools, 20
- Diet alterations, 99
- Dietary intervention, 25
- Dietary zinc, 103
- DSM-5, 20
- DSM-III, 18
- DSM-IV, 18

E

- Early signs, 19
- EMDR therapy, 37
- Emotional stabilization, 62
- Energy conversion, 82
- Environmental factors, 7

Etiology, 1, 5
Evaluation methods, 57
Extracerebral pathology, 10

F

Fecal microbiota transplants, 100
Firmicutes, 96

G

Gastrointestinal system, 98
Genetic factors, 7
Genetic overlap, 67
Genetic risk, 73
Genome-wide association studies, 69
Genomic copy number variants, 69
Gut microbes, 98
Gut-microbiota-brain axis, 95

H

Heterogeneity, 3
Higher-order functions, 44

I

IES-R, 38
Inflammation, 84
Information processing, 83
Intellectual disability, 3
Interventions, 50

L

Language, 23
Lower-order function, 44

M

Machine learning, 86
Magnetoencephalography, 60

Maternal infection, 8
Maternal nutritional status, 7
McGurk effect, 45
M-CHAT, 21
Micronutrients, 7
Mitochondria, 79
Mitochondrial dysfunction, 81
Multiple fMRI Modalities, 60
Multisensory integration, 44
Multisensory processing, 43

N

Narrative exposure therapy, 39
Neurexins, 9
Neuroligins, 9
Neuropathology, 9
Neuropsychiatric disorders, 67
Neuropsychological acoustic startle
 reactivity test, 58
Next-generation sequencing, 70
Non-coding RNA, 85

O

Obsessive-compulsive disorder, 3
Oxidative stress, 84

P

Pathology, 1, 8
Pervasive developmental disorder, 2
Pharmacological intervention, 25
Pitfalls in diagnosis, 40
Points of attention, 40
Postsynaptic scaffolding proteins, 9
Posttraumatic stress disorder, 34
Prevalence, 19
Probiotics, 99
Psychological comorbidities, 3

Q

Quality of life, 2

R

Restricted behaviors, 2

Rett syndrome, 2

S

Secondary symptoms, 3

Sensory characteristics, 56

Sensory profile, 57

SFARI gene database, 7

SIFI task, 45, 47

Signaling pathways, 84

Social cognition, 50

Social interaction, 2

SPARK list, 7

SRS-A, 38

Startle latency, 58

Symptoms, 19

Synaptopathy, 9

T

Tactile electroencephalography, 59

Tactile fMRI, 60

Theory of mind, 18

Tools to reduce sensory stimuli, 62

Trace metal dyshomeostasis, 8

Trauma, 33

Treatment, 17, 22, 36, 61, 86

Twin studies, 7

U

Underdiagnosis, 36

Undertreatment, 36

V

Visual electroencephalography, 59

Visual fMRI, 60

X

Xp22

Y

Young age, 5

Z

Zinc, 8

Zip2, 104

Zip4, 104
