

# Index

## A

- Adenosine diphosphate, 102
- Age-standardized global incidence, 3
- Alcohol consumption, 25
- Anti-metastatic agents, 124
- Arm volumes, 65
- Aspirin, 108
- ATP-competitive inhibitors, 171

## B

- Bioimpedance spectroscopy, 69
- BioZorb, 50
- Bone scan, 93
- Breast anatomy, 151
- Breast cancer incidence, 4
- Breast cancer proteome, 138
- Breast cancer risks, 4
- Breast cancer, 1
- Breast cancer-related lymphedema, 64
- Breast imaging, 83
- Breast reconstruction, 50
- Breastfeeding, 26

## C

- Calcium, 211
- Cancer genetics, 23
- Cancer microenvironment, 139
- Carbon dots, 157
- Carbon nanostructures, 151

- Carbon nanotubes, 155
- Cell death, 195
- Cellular adhesions, 118
- Circulating tumor cells, 106
- Circumference measurements, 65
- Cosmetic deformity, 45
- Cyclin D1, 168

## D

- Detection of breast cancer, 3
- Distant metastasis, 107
- Doxorubicin, 150

## E

- EGF/EGFR signaling, 140
- Epidemiology, 1
- EPIPs, 183
- Epirubicin, 150
- Epithelial-to-mesenchymal transition, 104, 116
- ER, 32
- ERα-polyubiquitination inhibitor proteins, 183
- ESR1 mutations, 182
- Estrogen receptor alpha, 169, 179
- Estrogen receptor positive, 32
- Estrogen, 26
- Ethnicity, 23
- Etiology, 21
- Extracellular matrix, 104

**F**

- FDG PET/CT, 93  
Female breast cancer, 3  
Fullerenes, 154  
Functions of the lysosome, 197

**G**

- Galectins, 115  
Gender, 22  
Gene amplification, 167  
Geography, 23  
Glycobiology, 117  
Graphene, 152  
Growth factors, 120

**H**

- Hematogenous breast cancer metastasis,  
    101  
HER2, 33  
Heritable factors, 23  
Heterocycles, 172  
Hormonal therapy, 26  
Human epidermal growth factor receptor  
    positive, 32

**I**

- IFN-I signaling, 135  
Imaging algorithm, 95  
Imaging-based measurement methods, 73  
Immunohistochemistry, 34  
Incidence of breast cancer, 2  
Intraoperative radiation, 49  
Intraoperative radiotherapy, 49

- Invasive breast carcinoma, 36  
ISG15, 137

**J**

- JAK1, 133  
Janus-activated kinase 1, 133

**K**

- Ki-67, 32

**L**

- Limb volumes, 68  
Luminal A, 33  
Luminal B, 33  
Lymph node localization, 46  
Lymphatic reconstruction, 53  
Lymphedema, 63  
Lysosomal hydrolases, 199  
Lysosome, 195  
Lysosomotropic agents, 206

**M**

- Magnetic field-based breast imaging, 87  
Mammography, 85  
Membrane stabilization, 211  
Membrane-associated proteins and  
    lipids, 200  
Menarche, 25  
Menopause, 25  
Metastasis, 38, 101  
Metastatic breast cancer, 115, 123  
Metastatic cascade, 104  
Metastatic focus of breast cancer, 93

Metric thresholds, 68

Mortality rates, 3, 5

## N

Nanodiamonds, 155

Nanomaterials, 149

Nanoparticles, 209

Novel breast cancer treatment, 179

Nutrition, 24

## O

Obesity, 24

Oncoplastic surgery, 48

Optoelectronic measurement, 67

Overall survival, 38

## P

Paclitaxel, 150

Paraneoplastic coagulopathy, 108

PF-4708671, 171

Physical activity, 24

Platelet derived growth factor, 104

Platelets, 101

PR+, 32

Primary breast tumor, 103

Progesterone receptor positive, 32

PROTACs, 179

Protein isgylation, 136

Proteolysis-targeting chimeras, 179

## Q

Quality of life, 2

## R

Race, 23

Radioactive seed localization, 45

Radiofrequency identification system, 45

Radiofrequency reflector devices, 45

Reactive oxygen species, 212

Receptor tyrosine kinases, 167

Refractory breast cancer therapy, 163

Relapse, 38

Reproductive history, 26

Ribosomal protein S6 kinase, 164

RPS6K1, 163

## S

S6K1, 164

Smoking, 25

Sphingolipids, 209

Stature, 24

Subtypes, 31

Surgical innovations, 43

## T

Tamoxifen, 150

Therapeutic target, 108

Thrombin, 102

Thromboxane A2, 102

Tissue dielectric constant, 71

TNBC, 32

Transforming growth factor-beta, 104

Treatment of breast cancer, 43

Treatment, 83

Triple-negative, 32

Tumor localization, 45

**U**

- Ubiquitin-specific peptidase 18, 131  
Ultrasound wave-based breast imaging, 90  
Urea derivatives, 172

**V**

- Volume calculations, 65  
Von Willebrand Factor, 102

**W**

- Water displacement, 68  
World Health Organization, 2

**X**

- X-ray-based breast imaging, 64

**Y**

- Y537C, 182  
Y537N, 182  
Y537S, 182

**Z**

- Zinc finger protein, 183  
Zinc oxide nanoparticle, 209
