

Digital Health

Simon Lin Linwood, MD, MBA
Editor

Professor Simon Lin Linwood, MD, MBA, is the Chief Medical Information Officer at the UCR Health and UCR School of Medicine, Riverside, CA, USA. He obtained his executive education in Artificial Intelligence Strategy and Implementation from Harvard University. He was named Innovator of the Year by CHIME in 2018. He is a national thought leader on digital transformation and acknowledged for providing vision and leadership in information technology to drive business growth in large, complex, and highly distributed environments. He has supervised and mentored many PhD students on data-driven innovation in healthcare, such as deep learning for risk prediction in population health to control costs, and methods to reduce physician documentation burden. He received Mentor of the Year Award in 2016. His areas of expertise include digital transformation, data-driven innovation, data science, data lake, artificial intelligence, and natural language processing, among others. He has extensively published on digital health, artificial intelligence/machine learning, data science, clinical informatics, genome informatics.
