

Index

A

Activation maps, 85
Acute stroke care, 86
Age-related macular degeneration, 49
Aging society, 67
Algorithms, 21, 78
Analysis, 9
Anterior segment, 52
Aphakia, 47
Artificial intelligence, 1, 36, 39, 47, 73, 107
Asthma, 121
Asynchronous modalities, 48, 51, 52, 54

B

Biometric data, 8
Biosensor, 36, 38
Blindness, 47
Blood supply and consumption, 113
Blood transfusion chain, 114
Bouchon 1-2-3 model, 93
Build your own model, 28

C

Cancer risk prediction models, 17, 19
Case selection, 23
Challenges, 11
Chronic obstructive pulmonary disease, 122
Chronic respiratory diseases, 122
Clinical decision support systems, 74
Congenital cataracts, 47
Consent, 11

D

Data acquisition, 7, 98
Data and information, 4
Data preparation, 24
Deep learning, 47, 74, 75, 78
DeepROP, 47
Diabetic retinopathy, 48
Digital age, 123
Digital assistive devices, 66
Digital determinants of health, 124
Digital footprint, 113
Digital health equity, 121
Digital health, 33, 64

E

Early diagnosis, 18
E-health, 40
Electronic health records, 17
Electronic health, 36
Equitable digital health tools, 125
Ethical issues, 11
Explainable artificial intelligence, 83
Explainable decisions, 73

F

Face-to-face appointments, 125
Feature selection, 20
Federated databases, 17, 25
Feedback, 9
Functional outcomes, 73
Funding trends, 35

G

Generic ontologies, 97
GER-e-TEC, 91
Geriatric risk remote monitoring, 91
Glaucoma, 50

H

Handling missing data, 21
Health (in)equity, 123
Health and longevity, 66
Health data, 7
Health education, 123, 125
Health outcomes, 127
Healthcare, 1
Healthy aging, 63
Historical analysis, 33
Historical milestones, 108
Home exercise program, 67

I

Implementation, 115
Importance rating, 84
Information and communication
 technology, 63
Inhalation technique, 125
Institutional review board, 22
iROP, 47
Ischemic stroke, 73

J

Japan, 63
Japanese Geriatrics Society, 67
Jurisdiction, 11

K

Keratitis, 47
Keratoconus, 47

L

Legal issues, 11
Lens dislocations, 47
Liability, 12
Local hospital data, 22

M

Machine learning, 47, 74, 75, 78
mHealth apps, 4
Microcornea, 47
Microphthalmia, 47
Mobile applications, 126
Mobile health, 36, 40
Model development, 20, 24
Model interpretability, 22
MyPredi platform, 95

N

Neural network models, 81
Neuroimaging, 81
Neuro-ophthalmology, 53
New technologies, 66
NIH funding, 33
Nursing homes, 94

O

Observational data, 18
Observations of daily
 living, 4
Ocular biomicroscopic
 videography, 47
Older people, 63
Online reporting tools, 36
Online SALONE app, 69
Ophthalmology, 45
Opioid crisis, 33

P

Pancreatic duct adenocarcinoma, 17
Passive data collection, 8
Patient confidentiality, 27
Patient-generated health data, 1
Patient-reported outcomes, 4
Pediatric ophthalmology, 54
Portable spirometry, 125
Predictive models, 79
Process model, 5
Prospective clinical trial, 29
Protecting patient confidentiality, 23
Psychosocial support, 124
Pterygium, 47

Q

QCancer, 19
Quality of information, 12
Quality of life, 8
Query development, 29
Querying process work, 26

R

Randomized control trial, 18
Rankin scale, 77
Real-time model deployment, 28
Real-world data, 20
Regulatory issues, 11
Rehabilitation, 66
Remote monitoring, 101, 102
Remote patient monitoring, 4
Remote rehabilitation, 70
Retinopathy of prematurity, 47
Robots, 66

S

Secondary use, 12

Self-management, 123, 125
Self-tracking, 4
Single-institution data, 25
Slit lamps, 46
Smart device, 5
Smartphones, 46
Smoking cessation, 124
Social determinants of health, 124
Stroke outcome prediction, 83
Structured data, 79
Synchronous modalities, 49, 51, 53, 55

T

Target areas for equity
 considerations, 125
Technology funding trends, 38
Technology innovations, 34
Telehealth, 45
Telemedicine, 92, 94, 121
Telemonitoring, 123, 126
Teleophthalmology, 46
Telerehabilitation, 69, 123
Telespirometry, 125
Transfusion medicine, 107
Transmission and storage, 8
TriNetX, 26

U

Unconventional features, 21
Utilization of health monitoring
 devices, 126

V

Validation, 23
Vein-to-vein digital footprint, 115
Virtual reality, 36, 38
Virtual visits, 125

W

Wearable smart devices, 8
Websites, 126
William Harvey, 109
Wireless technologies, 1

X

XGBoost, 21

Y

Yearly changes, 37
